## **ETALIC FINE FLEX**

***Etalic Fine Flex*** is a epoxy based Adhesive for fixing tiles & stone of small or big format on wooden wall and floor.

### ADVANTAGES:

- Easy to use
- High tensile strength
- Good coverage
- High bond strength
- Wall cladding
- High durability
- Heavy duty applications.

Support on wooden wall and floor.

***Etalic Fine Flex*** is a two component, heavy-duty, chemical resistant adhesive for fixing tile & stone of small & big format on wooden wall & floor. It provides excellent, highly durable bond strength for fixing tile & stone on surfaces. Etalic fine flex adhesive can be used in wet, internal and external areas. Due to its chemical resistant properties, it can also be used in commercial installations of chemical prone areas, commercial kitchens, restaurants, high traffic and workshop areas.

### Features:

- It has excellent adhesion properties, tile & stone can be fixed on the surface like wood, plywood and stone.
- It can be applied for wet areas, internal and external applications.
- Highly durable and impact resistant.
- Mechanical fixing is not required for a higher height level.
